COPY 1 OF 4

29 July 1957

Dear Dan:

As a result of a meeting and mock-up inspection held at Contractor's facility the week of July 21, attended by representatives from Project Headquarters and the WSPO, it was decided to authorize the prototyping of an ejection seat in one of the F.O.G. articles. Accordingly, you are requested to authorize the contractor under SP-1914 to proceed with the required engineering and manufacturing to prototype this installation. Pursuant to agreements between SWB and [redacted] the cost of the prototype only will be split 50-50 between the two interested parties. Contractor should be requested to furnish a cost and delivery as soon as practicable.

S. W. Brewer
